

# Docker for Data Science

**R-Ladies Cape Town**  
**Apr 17 2018**

**Dr Monika Obrocka**  
**@MonikaObrocka**

# Docker Components

# Grand Vision

[pinsleepe.github.io](https://pinsleepe.github.io)

# Outline

- **Why use Docker?**
  - Terminology
- **Docker Hub**
  - Useful Commands
- **Usecases** ← interesting bit
- **Your usecase?**

# My story with Docker

**Joined new team**

**Given half finished project**

**Spaghetti code**

**Config files? Virtual environment?**

**Never finished it....**

[pinsleepe.github.io](https://pinsleepe.github.io)

# Why use Docker?

**It provides everything an application needs to run, like file system and software applications.**

**Low barrier to entry. Yes.**

**Ecosystem with multiple external tools.**

**Not only for DevOps**

# Terminology

**Dockerfile**      a text file with the build instructions

**Image**      essentially a disk image.

**Container**      a running image.

# Useful Commands

`docker search` and `docker pull`

`docker run` and `docker stop/start`

`docker rm` and `docker rmi`

`docker ps` and `docker images`

# Docker Hub

**App store for Docker images**

**No Dockerfile necessary - only Docker Hub account**

**Major features:**

**Image repositories**

**Automated builds**

**Organizations with work groups**

**GitHub and Bitbucket integration**

**Go to Hub**

# Useases + live demo

- **Rstudio**
- **TensorFlow with Jupyter**
- **Python**
- **TimescaleDB**

# RStudio

**rocker** a collaboration between Carl Boettiger and Dirk Eddelbuettel

**Demo...**

[pinsleepe.github.io](https://pinsleepe.github.io)

# TensorFlow with Jupyter

**Jupyter** notebooks are a popular option for sharing data science workflows

Demo...

[pinsleepe.github.io](https://pinsleepe.github.io)

# Python

**python**

**Demo...**

[pinsleepe.github.io](https://pinsleepe.github.io)

# TimescaleDB

**timescale**

**Demo...**

[pinsleepe.github.io](https://pinsleepe.github.io)

# Next time!
